Minor Rib Snow Guard

5" Wide Face

HOLDS 3700 LBS
Mechanical Attachment

3" Long Base

5" Wide Base

HOLDS 850LBS
Adhesive Attachment

The Minor Rib Snow guards are designed for metal roofing: Standing Seam panels and corrugated roofing. The guard has a 5" wide face, 3" tall face, 3" long base, and a 5" wide base. They have a step in the base that is $\frac{1}{4}$ " high and $1\frac{1}{2}$ " wide to straddle a stiffening rib. The Guard can be mechanically fastened or adhesive mounted to the flat of the panel. This plastic snow guard is compatible with all metals and composites. It features four interior stabilizers for added strength. These guards can be used for retrofit or new

Construction. They are pre-drilled for easy installation. They are available in clear and an array of in stock colors. Please call for technical schematics and layout information.
